Admin Panel - User Management using CodeIgniter

#####Admin Panel - User Management Demo using CodeIgniter + AdminLTE Bootstrap Theme

The code is uploaded to demonstrate the simple role based Admin Panel application using CodeIgniter(MVC Framework)

Installation

Download the code from repository. Unzip the zip file.

Open browser; goto <localhost/phpmyadmin>.

Create a database with name "cias" and import the file "cias.sql" in that database.

Copy the remaining code into your root directory:

for example, for windows

WAMP : c:/wamp/www/cias

OR

XAMPP : c:/xampp/htdocs/cias

Open browser; goto localhost/cias and press enter:

The login screen will appear.

To login, I am going to provide the user-email ids and password below.

System Administrator Account :

email : admin@codeinsect.com

password : codeinsect

Manager Account :

email : manager@codeinsect.com

password : codeinsect

Employee Account :

email : employee@codeinsect.com

password : codeinsect

Once you logged in with System Administrator account, you can create user or edit previous user if you want.

Youtube Links :

[CodeIgniter Admin Panel Demo](#) : This video contain the demo of CodeIgniter Admin Panel.

[How to setup CodeIgniter Admin Panel](#) : This video contain the procedure of setting up CodeIgniter Admin Panel.

ISSUE # 1 : After login "loginMe" controller is not found :

Lot of people raising this issue, I resolved it 4-5 times for every user. People are not searching for closed issues. Thats why I am going to put this here.

How to get over this issue?

1. enable mod_rewrite.dll (or mod_rewrite.so) by removing leading # in httpd.conf.
2. After that, follow this solution <https://stackoverflow.com/questions/24472349/htaccess-doesnt-work-on-xampp-windows-7>

ISSUE # 2 : Call to undefined function password_verify() :

Solution is here : [Call to undefined function password_verify\(\)](#)
